

DESIGN PROFESSIONAL Learning Series

Commissioning Concepts offers technical training sessions for design professionals who desire to obtain practical industry information on the following subjects:

- **The Commissioning Process**
(How to Get Value From Commissioning)
- **The Retro Commissioning Process**
(Using Retro Commissioning as a part of the Remodel Process)
- **Project Quality Control Through Commissioning**
(Solving the Low Quality of Today's Construction Market)
- **Commissioning For LEED-NC**
(Making LEED Buildings Perform as Designed)
- **Test & Balance**
(How TAB is Affected by Design)

Each topic is designed as a one hour training session followed by a question and answer period.

Instructor Bio

Jim Bochat, President of Commissioning Concepts, is a LEED-AP, a member of ASHRAE, and a member of NEBB. Jim has been instrumental in developing National Commissioning standards since 1993. He has served as the international President of NEBB, National NEBB Commissioning Committee Chairman, and currently serves as a technical Commissioning instructor and Committee member for NEBB.

Jim has taught commissioning throughout the USA and in Australia and has been a speaker for groups such as RMA, IRC, NYCERTA, PEI, NEBB and AMCA of Australia. His career has included HVAC design, Process design, Mechanical construction, Controls design and construction, Commissioning and Retro Commissioning. This wide range of experience allows him to provide Technical Commissioning Services to a greater depth than most commissioning firms.
